LOADSHACKLE / BODY-ORIGIN RFQ PREPARATION WORKSHEET

Original body and sensing-pin fit review worksheet

Version 1.0 | 2026-11-25

BLANK FIT-REVIEW WORKSHEET. Not a production drawing, compatibility approval, issued rating, origin certificate or permission to modify load-bearing hardware.

1 - State the body-origin request

Project / requested WLL and units / quantity: _____

Track: named original-maker body / alternative forging / both

Original body or instrument maker / exact model / stock code: __

Serial, drawing revision and required body-origin records: _____

Permitted modification/substitution and approving party: _____

2 - Compare the complete connection

Original and proposed pin diameters, fits and tolerances: _____

Jaw / inside bow dimensions and actual drawing datums: _____

Usable bobbin or tongue width, contact and side clearance: _____

Support span, sensing direction and calibration arrangement: ___

Keeper / nut-cotter / axial retention / anti-rotation details: ___

Connector/radio/guard envelope and assembly handling access: ___

Keep each manufacturer's dimension symbols and endpoints. Equal WLL labels or close dimensions do not establish interchangeability.

3 - Identify documents and approval boundaries

Actual complete-assembly drawing/revision and rating: _____

Calibration chain, proof procedure, NDT and material scope: ____

Original-body document issuer and covered identity: _____

Responsible reviewer for the changed sensing-pin assembly: ____

Original hardware documents do not automatically cover a modified instrumented assembly. Compare the offered configuration and its actual scope.

4 - Compare equal commercial scope

Body / sensing pin / electronics / NRE / fixtures: _____

Calibration / proof / NDT / witness / document inclusions: _____

Packing / freight / duties / commissioning / spares: _____

Actual lead time, recalibration and outage/rental assumptions: __

Unresolved items / owner / release record: _____

Use actual offers and utilization assumptions. No fixed saving or rental payback follows from this worksheet.
